

Muslims in Tech

“Working with **Muslims in Tech** was a collaborative and educational experience for the students and staff”

"ICOM's students involvement with the "Muslims in Tech" program experienced significant benefits from the initiative, gaining valuable insights into the future landscape of the tech industry and the reasons to consider a career in tech. Their response to the engagement was overwhelmingly positive, with many expressing newfound enthusiasm for pursuing tech-related professions. The program successfully demystified the industry, providing them with a clearer understanding of the prospects available and the possible impression they could make.

Working with Muslims in Tech was a collaborative and educational experience for the students and staff. The mentors from and industry professionals involved with Muslims in Tech provided valuable guidance, sharing their experiences and know-how to help students navigate the complexities of the tech world. The inclusive and supportive environment fostered a sense of community, encouraging students to explore their interests and aspirations within the field.

Based on the positive interactions with or students that was observed, I would highly recommend Muslims in Tech's Careers of the Future program to others. The program not only prepares students with essential knowledge about the tech industry but also fosters a sense of belonging and empowerment. By offering valuable mentorship and exposure to real-world scenarios, the program effectively prepares students for the challenges and opportunities they may encounter in their future tech careers."
